

SHC 15 GB

SMALL WATER HEATER

Less is more.

The useful small water heater can supply multiple low-demand draw-off points. This pressure-tested appliance suits all commercial mains pressure taps and valves.

Undersink installation saves energy and water.

Undersink appliances heat water at the draw-off point. They reduce energy and water losses through short pipe runs. In addition, the high grade thermal insulation ensures low standby losses. Hot water on demand.

The main features

Also available with a higher storage volume for a very frequently used draw-off point

Plug-in unit for connection to any standard socket

Small water heater for undersink installation

Very low energy losses thanks to high grade thermal insulation

Pressurised version for use with commercially available taps

For supplying one or more draw-off points with DHW
